SEEDS 1898

Bulk Seed Price List

Garden, Flower, Field and Grass Seed

Bulbs, Plants, Nursery Stock and Garden Tools.

Clover, Alfalfa, Timothy,
Blue Grass, Seed Corn.

MICHAEL'S Seed Store

316 PEARL STREET,

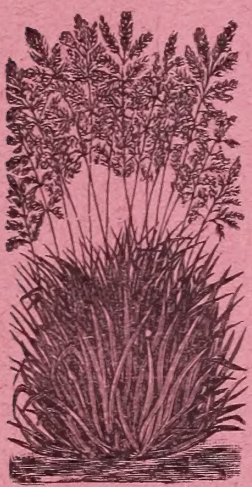
J. S. MICHAEL, Prop. SIOUX CITY, IOWA.

N. B.—We are always in the market to buy all kinds of Field and Grass Seeds if you have any to sell. Mail samples.

SEEDS. 316 Pearl St.

Market Gardeners Attention.

I WISH to say to you that we handle nothing which we do not know to be good and the very best obtainable, and while we do not claim to compete with the trash that haphazard growers often sell to dealers, we will make you prices on a class of seeds true to name, pure and good test that will save you money by coming here to buy your seeds instead of sending a thousand miles away for them.



Kentucky Blue Grass.

It is my aim and ambition to build up as reliable a **retail seed store** here in Sioux City for your benefit as can be found anywhere in the world. I know you will appreciate it and share your trade with me that, that result may be accomplished.

SPECIAL OFFER.

5c papers 2 for a nickle.

12 for 25c **25 for 50c.**

Farmers Welcome

You will *make a mistake* if you don't go to a seed store to buy your seed for both the field and the garden. I will spread your dollars thin and save you money every time. Come and see me. You are always welcome. If you have any field seed to sell send me samples Millet, Clover, Timothy, etc.

J. S. MICHAEL,

SEED MERCHANT.

Michael's Seed Store,

316 Pearl Street, SIOUX CITY, IOWA.

REMEMBER to come and see us or send your orders by mail.

WHITE BALTIC OATS.

IOWA GOLD MINE FIELD CORN.

Satisfying ourselves of the merits of the Iowa Gold Mine Corn, we offered it to the trade for the first time in the spring of 1894; being a beautiful sample and endorsed by our experimental test, it took like magic. Reports of crops grown prove it to be all the name implies—a gold mine to every planter who has raised it. It is a medium late variety; stalks are heavy, good size, of a rich vital color, and often bear more than one well-made and good-sized ear. The grain is a rich, yellow dent, long deep kernel, and closely knit on a very small cob; will often shell as much as 64 lbs. to 70 lbs.. It costs but A TRIFLE PER ACRE for good seed corn. An increase of one or two bushels of corn per acre means millions in wealth to the farmers of Iowa and surrounding States. **Every Planter** should remember this and plant **Iowa Gold Mine Seed Corn** the coming season. Sample ear of this or any variety we handle mailed, POST-PAID, 15 cents. $1.00 per bu.; 5 bu. $4.00. Bags 15c each.

EARLY SIX WEEKS POTATO.

This variety is without exception the earliest potato ever grown. A perfect table potato, ready for the market in six weeks, and matured is 72 days. It is a wonder and without equal. The past season—the worst ever known on the potato crop in this part of the country—it yielded at the rate of 200 bushels per acre in this county , and a good season will yieid 600 bushels per acre. It is worth its weight in gold to gardeners for a start in the seed, as with it they can always get the **Fancy Price** before any other kind comes on the market. We are booking orders now for spring delivery. Supply is limited. See to it that your name is booked for some before it is too late. Per bu. $1.25. Ask for prices; large lots.

EARLY WHITE BALTIC OATS.

In offering the Early White Baltic Oats we wish to say that here is an oat that for earliness cannot be surpassed; is entirely free from rust and for a small oats the great yield per acre is wonderful. It has a short, stiff stalk that withstands the storms, never lodging but standing like so many little giants, firmly supporting a well filled head of beautiful white oats. 60c per bu; 10 bu. $5.00.

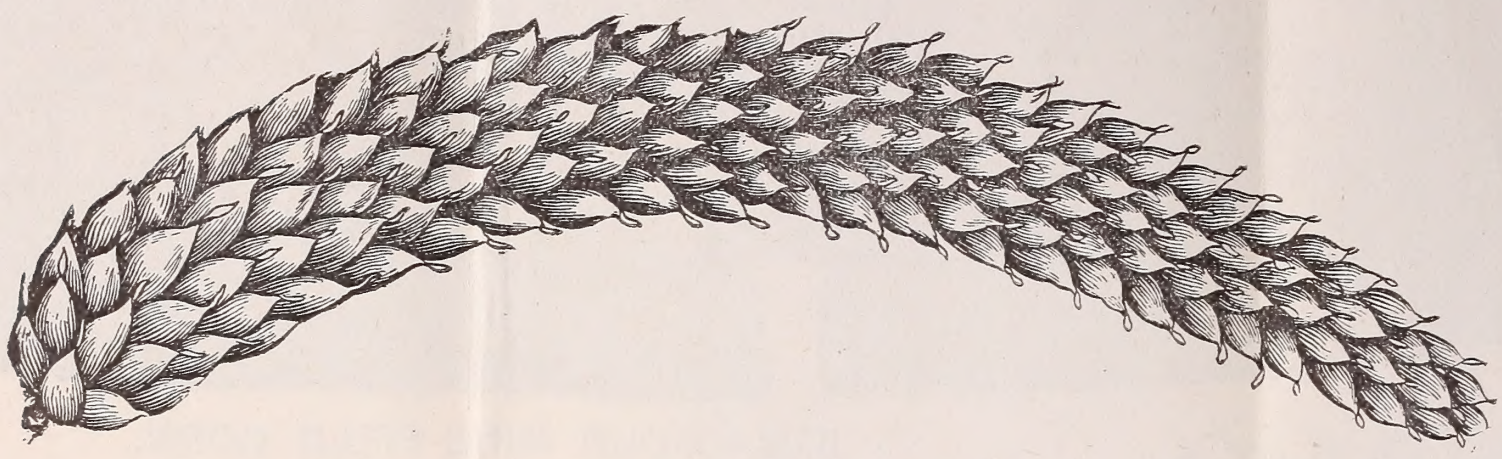
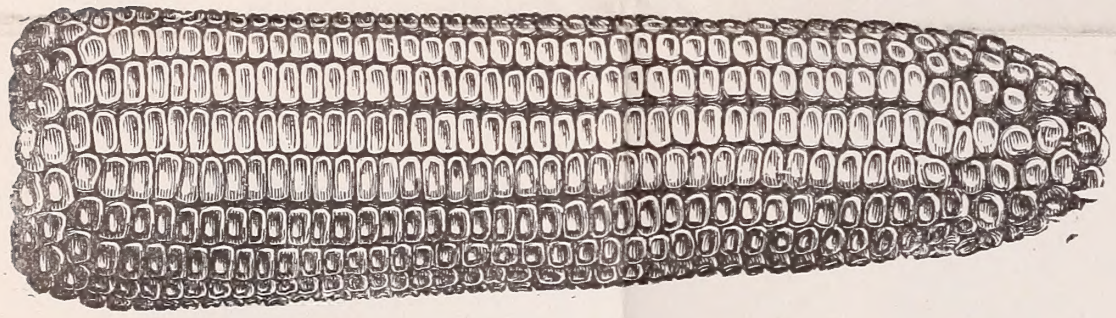
SIOUX CITY, IOWA.

SILVER BEARDLESS BARLEY.



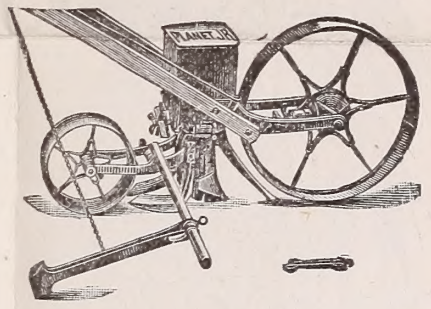
Do you raise barley? If you do then you know how the prickley beards stick you in the harvest. Here is a barley my farmer friend that overcomes that awful annoyance. A barley that is actually without beards. Just as smooth as wheat. Looks same as any ordinary white barley when threshed; is a wonderful heavy yielder, outyielding the old prickley bearded sorts two bushels to one. Has a stiff, strong straw; stands up well and does not shell out when ripe. Never known to smut, a great stooler; is healthy, strong and vigorous. It is six rowed and has a longer head than most any variety known; is early ripening—wo weeks ahead of the other sorts, in fact possesses every good feature that anybody could wish in a barley. Samples free on application. $1.00 per bu.; 5 bu. $4.00, 10 bu. $7.50. Bags extra 15c each.

DULY'S HYBRID SEED CORN.



PLANET JR.
HILL DROPPING
DRILL.

Plants in Hills or Continuously.
Spot cash, $6.00.



This corn, which we have lately introduced, is a selection we have made from the earliest big yellow dent sorts, now so famous in the upper Missouri Valley country and is the earliest large-eared yellow dent corn known. We introduced it last year. It is a big yielder, nearly as early as the "Pride of the North," and outyields that well-known sort two to one. Fields of this corn planted in June last produced a splendid crop long before September frost came. This is just the corn for the Dakota, Iowa and Minnesota farmer, and no planter should fail to plant at least a part of his crop with this excelsior of all early varieties. Samples free. Per bu. $1.00; 5 bu. $4.50, 10 bu. $8.50; bags extra 15c each.

ALFALFA CLOVER.

This valuable forage plant having been tested and tried in the climate and soil of the Northwest with splendid results is now a standard grass crop for this entire region. With few exceptions it has given the best of satisfaction. It should be sown on well cultivated land in the spring as soon as the gronnd is in a tillable condition. Can be drilled or sown broadcast. If drilled 15 to 20 lbs per acre is sufficient; when sown broadcast 20 to 25 lbs per acre is required. When drilled it should be covered lightly and then cross-harrowed, which insures an even stand. If broadcast a light harrow will cover it well enough. A better stand is always gotten by rolling the land after sowing. It is best to sow it by itself, though on clay or cloddy soil or land given to weeds it is thought best by many to sow a very light sprinkle of wheat, barley or oats as a nurse crop. Some farmers cut it for hay the first season, but this depends entirely upon the rapidity of the growth and is not recommended until the second year. If the field gets weedy the weeds must be mowed and raked off or they will choke out the young plants Once it gets started the Alfalfa soon takes possession of the ground and kills out the weeds. A light sprinkle of manure is of great value for the first winter. It has a wonderful growth and turns as much as three crops per season. The hay is rich and nutritious and valuable feed for all farm animals. It is very valuable as a hog pasture and one acre will keep 10 to 20 hogs through a season. Every farmer should have a field of Alfalfa. The seed costs but a trifle compared with results. Special prices with samples on application.
